

Riverside Health System
PGY-1 Community Pharmacy Residency Manual
2024-2025

Welcome to Riverside!

On behalf of our entire team, we are pleased to extend a warm welcome to you as our newest community-based pharmacy resident. We are thrilled to have you join us and are confident that you will find Riverside Health to be a place of growth, learning, and fulfillment. We understand that transitioning into a new role and environment can be both exciting and challenging; rest assured, we are here to support you every step of the way. Your success and well-being are our priorities, and we are dedicated to making your transition as smooth as possible. Whether you have questions, need assistance, or simply wish to discuss your experiences, please do not hesitate to contact us. We are here to listen and provide support in any way we can.

Riverside Health values diversity, inclusivity, and a strong sense of community. You will find a wealth of resources, opportunities, and activities designed to enhance your professional and personal development. We encourage you to engage fully with all that our community offers, from collaborative projects and professional development programs to social events and community outreach initiatives. We also prioritize creating a safe and secure environment for all our residents. We have implemented various measures to ensure your peace of mind, and we encourage you to familiarize yourself with our guidelines and safety procedures.

Once again, we are delighted to welcome you to Riverside Health. We believe that this experience will be a stepping stone in your career, where you can build lasting professional relationships, pursue your passions, and create meaningful contributions to community health. We look forward to getting to know you and supporting you on your journey. If there is anything we can do to assist you or if you have any questions, please do not hesitate to contact us.

Welcome to Riverside Health!

Warmest Regards,

Cindy Coffey, PharmD -Residency Program Director

Zakia Woods, PharmD, CDCES- Residency Program Coordinator

Coreen Tan, PharmD, BCPS -Residency Creation Team

Waimin Khuu, PharmD -Residency Creation Team

Section I: Program Overview

Program Purpose

Mission

Our mission at Riverside is to care for others as we would care for those we love — to enhance their well-being and improve their health.

Program Purpose

Our postgraduate year one (PGY-1) Community-Based pharmacy residency program builds on Doctor of Pharmacy (PharmD) education to contribute to the development of exemplary community pharmacists through leadership, education, medication-related care in a diverse group of patients within an integrated health system network.

Goals

The pharmacy residency program is rooted in the Riverside Care Difference which is the way we deliver care and services, by putting our patients and customers at the heart of all we do. The Riverside Care Difference is our commitment to deliver safety, healing, kindness, and respect.

The residency program will provide each resident with specific learning/practice experiences designed to enable the resident to expand the scope of his/her practice skills to better serve the needs of the community. The goal of the residency program is to prepare resident pharmacists to become well-rounded, competent and confident clinical pharmacists capable of working in a variety of community-based pharmacy roles within the community or pursue advanced training opportunities including postgraduate year two (PGY2) residencies and professional certifications.

Riverside Site Description

Riverside Regional Medical Center (RRMC) is a 450-bed, Level II Trauma Center with new state-of-the art facilities and is the largest hospital in Riverside Health System, which incorporates seven other practice sites: Riverside Walter Reed Hospital, Riverside Tappahannock Hospital, Riverside Doctors' Hospital Williamsburg, Riverside Rehabilitation Institute, Riverside Mental Health and Recovery Center, Riverside Shore Memorial Hospital and Select Specialty Hospital. This acute care facility provides a regional cancer care center, the Peninsula region's only Comprehensive Stroke Center, the area's only open-heart surgery program, the region's only Level II Trauma Center, and a cornerstone neurosciences program that includes the Chesapeake, Riverside and University of Virginia Radiosurgery Center. RRMC recently finished construction on a brand-new addition to the hospital in the summer of 2018 that added 144 private patient rooms.

Pavilion Pharmacy is a community pharmacy located within Riverside Regional Medical Center, serving as the primary retail pharmacy for the health system. Pavilion Pharmacy's unique location allows for meaningful impact on readmission reductions through the meds-to-beds and transitions of care (TOC) programs. The pharmacy team strives to eliminate healthcare inequities through the provision of sustainable and affordable drug therapies.

Our accredited specialty pharmacy program provides high cost, high touch medications to those diagnosed with complex chronic diseases which require close monitoring. The pharmacy team removes barriers to specialty medication access by conducting benefits investigations, prior authorizations and appeals, copay, and patient assistance programs. The personalized service includes medication counseling and education, care plan development, injection technique training, monthly progress consultations and medication refill management.

RRMC hosts over 70 medical residents practicing in various specialty areas, allowing for frequent interaction on learning experiences. Pharmacy residents are incorporated into many of the medical resident teaching opportunities, including Grand Rounds, lunch and learns, and academic research day. Strong affiliations with pharmacy schools allow us to provide over 60 student rotations annually, and exposure to numerous journal club and student presentations.

Residency Advisory Structure

Residency Program Director (RPD): The residency program director (RPD) is responsible for overseeing all aspects of the residency program. Responsibilities of the RPD include:

- Organization and leadership of the residency advisory committee that provides guidance for the residency program conduct and related issues.
- Oversight of the progression of residents within the program and documentation of completed requirements.
- Oversight of preceptor appointment, evaluation, and development
- Coordinating with preceptors to develop schedules, learning experiences, and to track the resident's progress.
- Develop and implement program improvement activities in response to the program assessment results.
- Evaluate whether residents fulfill the purpose of the program through post-graduate tracking of employment, board certification, or other applicable information.

Residency Program Coordinator (RPC): The residency coordinator will be assigned at the discretion of the residency program director. The residency coordinator responsibilities include but are not limited to assisting the residency program director with: scheduling resident learning experiences, organizing the residency project learning experience, initial resident development planning, creating and implementing preceptor development program activities, and annual individual preceptor development planning.

Residency Advisory Committee (RAC): Members of the RAC include preceptors for the required learning experiences and the Residency Program Director. The purpose of the committee is to communicate issues regarding the residency or resident. The committee will meet at least every other month. Responsibilities of the committee include discussion of resident progress, addressing resident concerns, changes to schedules, changes to the residency program, and preceptor development.

Residency Steering Committee (RSC): Members of the RSC include the Director of Pharmacy, System Clinical Director of Pharmacy Services, Clinical Pharmacy Manager, Pharmacy Operations Manager, Residency Program Director, and Residency Coordinator. The purpose of this committee is to provide general oversight of the residency program to ensure congruence with the goals and objectives of the health system. The committee meets at least twice a year. Responsibilities of the committee include but are not limited to considerations for future learning experiences, identifying potential preceptors, discussion of and deliberation of the residency candidate rank list, and finalizing major changes in the residency program structure.

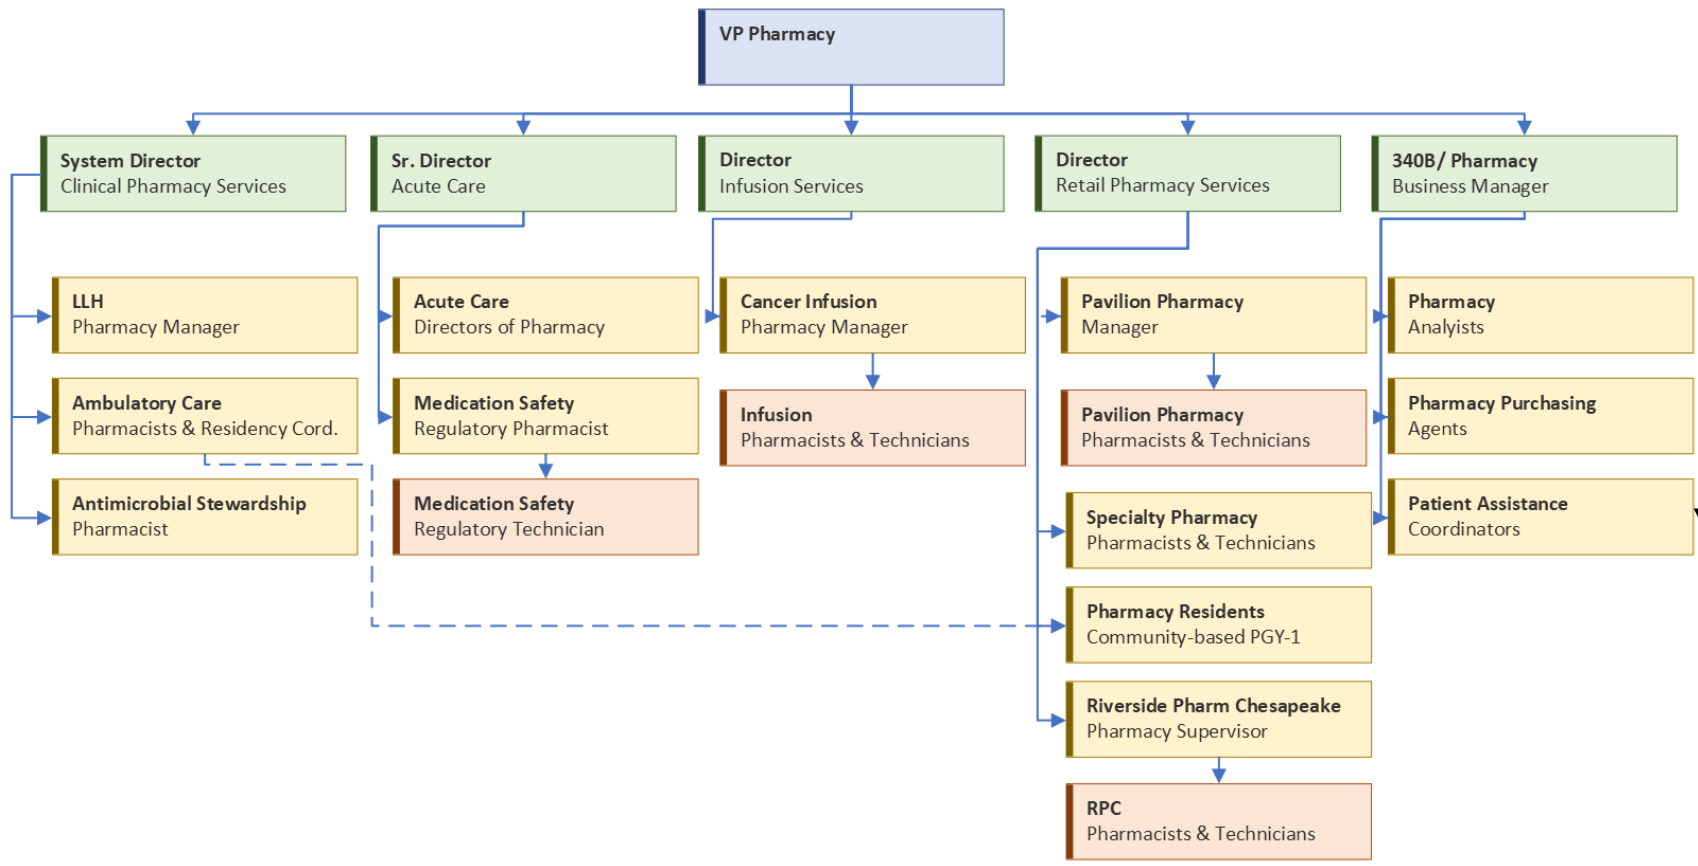

Learning Experience Preceptor: The learning experience preceptor is responsible for overseeing and evaluating the resident within the assigned learning experience as well as participating actively in the residency program's continuous quality improvement processes. Responsibilities of the preceptor include:

- Serving as a role model for learning experiences while demonstrating practice expertise and preceptor skills.
- Contributing to the success of the resident and demonstrating commitment to advancing the residency program and pharmacy services.
- Adhering to residency program and department policies.

This program utilizes non-pharmacist preceptors. Before a resident may begin a learning experience with a non-pharmacist preceptor, the RAC committee must agree that the resident is appropriately prepared for a learning experience with a non-pharmacist preceptor.

Resident Project Advisor: The resident will be assigned a project advisor who will assume the responsibility to guide the resident in completing the required research project. The advisor will be assigned according to subject matter and expertise.

Pharmacy Organizational Structure

Program Calendar: 2024-2025

July 1: Official start of residency year, System Wide Orientation/Riverside Care Difference/ Facility Orientation

July 2-3: Residency Program Orientation

July 4-5: Epic Training

July 8: Headshots, White Coat fitting @ RRMC, Start CITI & 340b Training

July 12: Teaching and Learning Certificate Day @ VCU

July 26: VSHP Residency Day

July 29: CPR/BLS Training

July 30: Specialty Pharmacy Training

Aug 2: End of orientation:

- CITI training due, Cardinal Health Streams due, Project selection due

July: Initial Resident Development Plan meetings with RPD, clinical coordinator

Aug 1: Deadline to obtain VA pharmacy licensure without action plan

Aug 15 : ASHP Poster abstract submission site opens

Aug 31: Project proposal submitted to IRB.

Aug: Initial Project meetings with project advisor, clinical director, RPD

Sept 30: End of Quarter 1

- Q1 longitudinal learning experience summative & self-evaluations due
- Q1 project tracking form due

Oct: ASHP Midyear abstract due October 1, 2024

Oct 17-19: VSHP Fall Seminar

Oct: Q1 Resident Development Plan meetings with RPD

Nov 1: Midyear poster draft due to RPD.

Dec 8-12: ASHP Midyear Clinical Meeting

Dec 31: End of Quarter 2

- Q2 longitudinal learning experience summative & self-evaluations due
- Q2 project tracking form due

Dec: Project meeting with project advisor, clinical director, RPD

Dec: Q2 Resident Development Plan meetings with RPD

Jan 20 - Feb 28 - Resident Interviews

Jan: T&L Spring Session at VCU ***Actual Date TBD***

Feb 3 : Registration opens for Eastern States Conference

March 3: Eastern States Abstract Due

March 31: End of Quarter 3

- Q3 longitudinal learning experience summative & self-evaluations due
- Q3 project tracking form due

March: Match Day Phase I ***Actual Date TBD***

Project meetings with project advisor, clinical director, RPD

Q3 Resident Development Plan meetings with RPD

March 31: Eastern States Residency Conference PowerPoint presentation draft 1 due

April 1 – April 8: Eastern States Residency Conference presentation practice

April: Match Day Phase II ***Actual Date TBD***

April 3-5 : VSHP Spring Seminar

April 18: Eastern States Residency Conference presentation due - Final version to RPD

May 1: Academic & Corporate research day poster or presentation due - Final version to RPD

May 1 : Eastern States Abstract Submission Deadline

May 15: Completed Manuscript due to RPD

May 18-21– Eastern States Residency Conference

May: Corporate Research Day ***Actual Date TBD***

May: Academic Research Day ***Actual Date TBD***

June 2: Manuscript draft 1 due

June: APPE Block 2 Orientation ***Actual Date TBD***

June: Annual Residency Graduation ***Actual Date TBD***

June 27 : Completed manuscript submission date.

June 30: End of Quarter 4

- Q4 longitudinal learning experiences summative & self-evaluations due
- Q4 project tracking form due
- Longitudinal learning experience ASHP learning experience & preceptor evaluation due.
- Objective based self-evaluation due in PharmAcademic
- Manuscript due - Final version to RPD
- End of year Assessment - Final version to RPD
- Tracking Form - Final version to RPD

Q4 Exit Interview with RPD

Section II: Program Structure

Learning Experiences Overview

The residency program consists of nine (9) required learning experiences and five (5) elective learning experiences of variable length. The program allows for flexibility to select activities that will complement the resident's background and career goals. Learning experiences are structured to provide a solid, fundamental experience but are flexible to recognize individual interests and the resident's predetermined plan for the development of various pharmacy practice skills. The plan for training will be based on the resident's entering interests and initial development meeting. The resident will meet with the RPD quarterly to evaluate progress throughout the residency program and adjust training plan and learning experience schedule if needed. The RPD and RPC will schedule all learning experiences in collaboration with specific preceptors. The individual learning experience preceptor will be responsible for issuing a schedule to detail the resident's assignments during that learning experience.

Required learning experiences include:

1. Orientation
2. Community Pharmacy Management
3. Transitions of Care
4. Specialty Pharmacy
5. Population Health
6. Ambulatory Care I
7. Ambulatory Care II
8. Project
9. Committee Leadership

Elective learning experiences may include:

1. Antimicrobial stewardship (AMS)/Life Long Health (LLH)
2. Behavioral Health
3. Oral Oncology
4. Health System Leadership/Patient-based Economic Aid and Relief (PEAR)
5. Teaching and Learning Certificate

Residency Project

Each resident will complete a research project during the pharmacy residency. The goal of the residency project is to provide residents with an opportunity to gain experience in conducting a practice-related project using effective project management skills. The resident will select a project, develop and implement design, present results, and complete a manuscript of the project. Meetings with the resident, RPD, clinical pharmacy manager, and resident project advisor regarding the status of the project will occur quarterly. Progress through the research project learning experience regarding competency areas, goals, and objectives will be evaluated quarterly by the project learning experience preceptor. The final research manuscript that is ready for publication is to be submitted to the resident project advisor and approved by the Residency Program Director by the end of the residency year.

General Timeline

Please keep in mind this timeline may vary based on the intervention being implemented but sticking close to this timeline can help make this process go more smoothly.

Project Identification	June-early July
CITI Training	June
Development of knowledge on subject matter	June-July
Literature Review	June-July
Initial Meeting with Project Preceptor	July
Project Protocol Completion	August
Project Protocol Approval	August
IRB	September
Privacy Board	September
Scholarly Activities Committee Presentation	
Intervention Design / Implementation - P&T approval if needed. - Pharmacy or nursing education	September – November
ASHP Midyear Abstract	September-October
ASHP Midyear Poster	October-November
Data Dictionary	December-January
Data Collection	January-March
Eastern States Platform Presentation Abstract	March
Eastern States Platform Presentation	May
RRMC Academic Research Day	May-June
RRMC Corporate Research Day (if applicable)	May-June
Manuscript Completion and Submission	April-June

Residency Project Timeline: 2024-2025

- July 1 - Orientation review submitted project proposals.
- Aug 2-End of orientation - CITI training due, project selection due, project mentor selected.
- August 15 - Written project proposal review with RPD
- August 30 – Research proposal form completed & IRB/privacy board submission due
- October 1 - Midyear abstract submission deadline
- November 1 – Midyear poster draft 1 due
- December 8-12 - Midyear poster presentation
- March 3 – Eastern States abstract due
- March 31 - Eastern States Residency Conference PowerPoint presentation due
- May 15 - Completed manuscript submitted to RPD
- May 18-21– Eastern States Residency Conference
- June 27 - Completed manuscript submission
- *August, December, March: Project meetings with project mentor, clinical director, RPD

Project Learning Experience Tracking Form 2024-2025

The resident will be responsible for maintaining the project learning experience tracking form throughout the course of the residency program. The tracking form will be uploaded into the Riverside Pharmacy shared drive under the residents individually mapped folder. The project learning experience tracking form is required to be updated and saved to the shared drive quarterly so progress of the project can be followed by RPD, clinical pharmacy manager, and resident project advisor.

CITI/IRB Training

CITI Training Instructions:

For **Biomedical Researchers**, please register for and complete:

- Good Clinical Practice (GCP) modules
- Biomedical Research modules

For **Social & Behavioral Researchers** please register for and complete:

- Social & Behavioral Research modules

Use this link : <https://www.citiprogram.org/> to register and complete your modules. Note: When registering please be sure to select Riverside Regional Medical Center, VA in the Participating Institutions drop down menu. Your affiliation with RRMCM allows the IRB department to track your progress. There are two Riverside Medical Centers listed in the drop down, please be sure to pick the one located in Virginia.

After you have created an account, please complete the required courses. You are not required to complete the Conflicts of Interest course.

The modules can be taken individually, as your schedule allows. A cumulative score of 80% is required to pass each course. You can retake quizzes until you have achieved 80% or above. **All courses will expire every three years**, at which time you'll be required to complete a refresher course.

Registering for courses on CITI can be confusing, if you run into trouble, please do not hesitate to contact the office (594-3219). Once you finish, we will be notified of your course completion and keep your certificate on file in the IRB office. **Please note per RHS policy, you are not able to participate in any research activity prior to successfully completing CITI training.**

Research Project Ideas 2024-2025

- CBL (Computer Based Learning) for staff education of 340B based on different stakeholder groups.
- Expense control for WAC spend at our covered entities.
- Value of the pharmacist in the gastroenterology or infectious disease clinics to facilitate completion of hepatitis C therapy (measured by interventions provided by the pharmacy team to remove barriers or referral to a hepatologist)
- Value of the pharmacist/pharmacy for HIV
- The impact of pharmacist-led counseling for newly diagnosed diabetes patients upon discharge.
- Streamlining pharmacist-led transitions of care program from acute care hospital to home.
- Dual Antiplatelet Therapy in Women: Initial portion of the project would be a medication use evaluation (MUE), with secondary steps being an action plan to address any care gaps discovered.
- Development of an ambulatory med safety workflow/review. Possible safety report outs regarding duplicate therapies, potentially avoidable complications of designated chronic condition(s), VE treatment. Initial portion of the project would conduct a needs assessment, with secondary steps to develop plan for monitoring and mitigating risk.
- Utilizing Pharmacist-Led clinic within Brentwood Family medicine for patients living with diabetes using Continuous Glucose Monitoring.
- Competency driven staff development programs to drive staff retention and job satisfaction.
- Emergency room readmission prevention with pharmacists' interventions with patients discharged on antibiotics.
- Multistep order transmittal process to effectively review medications before sending to designated pharmacies.
- Bridging the gap between hospital TOC and discharge TOC.
- Developing patient education videos for specialty medications to help increase understanding of injection techniques and medications.
- Reduction of errors with patient pick-up or shipment of prescriptions with the integration of badge scan technology and electronic will-call system.
- Evolving Meds to Beds Program
 - Stroke and/or CHF readmission reductions
 - Utilizing a discharge lounge to reduce throughput of patient discharges due to prescription delivery delays.
 - Patient education prior to discharge (improvement in HCAHP scores)
- Delivering medications to patients without transportation within the surrounding communities by partnering with local fire departments/EMTs.
- Development of a deprescribing algorithm (CPA with a prescriber to review for deprescribing opportunities; would start simple with PPI's or something similar)
- Implementation/development of a palliative care pharmacist role. Pending grant funding.
- Riverside Mental Health and Recovery Center Meds to Beds impact on readmission rates.

Teaching and Learning Certificate

Riverside is partnered with the Virginia Commonwealth University School of Pharmacy to offer a Teaching and Learning Certificate. Residents will have the option to enroll in the program. This program consists of live seminars, development and delivery of didactic lectures, journal clubs, and continuing education programs. Upon completion of the required elements, the resident will be issued a program certificate at the conclusion of the residency year.

Program Structure and Requirements (2024-2025):

Participants in this program, upon its completion, will be able to do the following:

1. Describe basic concepts in current pedagogical theory pertaining to pharmacy education
2. Devise a plan for effective teaching within the didactic and experiential settings to achieve clearly defined student outcomes
3. Compare and contrast teaching methods used in the large classroom and small group settings
4. Develop an approach to implement instruction within the didactic and experiential settings, including distance learning
5. Participate in and evaluate the current VCU method to assess educational activities
6. Compose a teaching philosophy that clarifies one's own purpose and goals related to teaching
7. Identify strategies for continued self-improvement related to pharmacy education

Teaching and Learning Certificate Portfolio Tracking Form

The resident will be responsible for maintaining the teaching and learning certificate tracking form throughout the course of the residency program. The tracking form will be uploaded into the Riverside Pharmacy shared drive under the residents individually mapped folder. The project learning experience tracking form is required to be updated and saved to the shared drive quarterly so progress of the project can be followed by RPD, and site coordinator. The teaching portfolio binder will have hard copies of the aforementioned documents. The overall performance of the resident in the program will be evaluated using the tracking form below. Final portfolios are due no later than June 1, 2025.

Requirement	Details		Completion Date
Attend and participate in (>80%) 8 out of the 10 of the teaching-related educational seminars + at least 1 Zoom Debrief. Place a check box in each of the sessions attended.	Session Title	Attended

Section III: Resident Responsibilities and Expectations

Residency Program Requirements for Completion

A residency certificate is awarded upon the successful completion of all residency requirements. Requirements for completion of the residency program will include:

- State licensure
- Successful completion of the goals and objectives of the program as defined:
 - Obtaining a level of “achieved” for at least 75% of the evaluated goals and objectives of the program.
- Completion of major project including submission of manuscript
- Completion of staffing requirements
- Completion of projects assigned by preceptors and residency staff including (but not limited to):
 - Drug monograph
 - Presentation of research project at ASHP Midyear Clinical Meeting and Eastern States Residency Conference or equivalent state or national conference

Ordinarily all training requirements must be met within the 12-month residency period. In the event of extenuating circumstances, a limited extension to complete training requirements may be granted. The resident must request an extension in writing to the Residency Advisory Committee which will meet to discuss and vote upon the request.

Residency certificates will be withheld until all requirements, including the major project, are successfully completed.

Policy and Procedures

Accreditation:

The Riverside Regional Pharmacy Residency Program will be designed to meet the ASHP PGY1 Accreditations Standards and Competency Areas, Goals and Objectives. Accreditation will be maintained through ASHP to ensure the highest quality program.

Benefits/Human Resources:

Pharmacy residents will receive an annualized salary of \$53,000.00, subject to applicable taxes and withholdings.

Resident benefits are the same as all Riverside employees. However, some exceptions apply as the pharmacy residency is under the umbrella of the Medical Residency program at Riverside.

These exceptions include:

- Immediate availability of "Paid time off"

The residents are provided professional leave and expense support to attend a VSHP meeting, ASHP Midyear meeting, and the Eastern States Residency Conference. A limited stipend will be provided for travel to these meetings. Additional costs accrued over this amount will be at the resident's own expense. Stipend for these meetings varies from year to year depending on meeting location, registration costs, and department budget.

The resident is also a pharmacist who will meet all the requirements of a pharmacist working in the Riverside Health System. This includes knowledge and orientation to all applicable Pharmacy and Hospital Policy and Procedures. The resident will receive the same pharmacy orientation as any new pharmacist hired by Riverside, and he/she will be held to the same performance standard.

The resident will use the Kronos system for logging time upon arrival and leaving for the day. Riverside human resource policies and procedures for professional, family, and sick leave will be followed. In the event, leave time affects the achievement of the residency requirements; the Residency Program Director, Director of Pharmacy and Human Resource representative with input from the resident will determine a recommended course of action. This written action will be reviewed and acknowledged by all parties concerned.

Paid Time off/Sick Leave

Over the course of the year residents are allotted 120 hours (15 days) of available paid time off (PTO) that can be used for vacation, and 48 hours (6 days) that can be used for sick leave (EIB). PTO requests will be submitted via the Kronos system for review by the Director of Pharmacy or designee who prepares the schedule and via email to the Residency Program Director for approval at least 5 weeks in advance prior to the preparation of the upcoming pharmacist schedule. Requests may not be approved if time off requested is not far enough in advance. Any approved PTO time will also need to be coordinated with learning experience preceptor. Time off requests must be approved by the Residency Program Director. The resident will document all PTO days in the duty hours log and the PTO log posted in the resident office. If sick, the resident will follow hospital policy to include contacting Pavilion pharmacy (if applicable), Residency Program Director and Coordinator, and learning experience preceptor.

In the event the resident must take additional time off that exceeds the allotted applicable paid leave, they will not be awarded a certificate of completion unless that additional leave is made up. In this circumstance the resident will follow the process outlined below in the Requirements for Completion section. Time off requests for professional days, including interviews and travel time will be subject to the same process.

Your Pay & Benefits Package

As part of the Riverside family, you get a comprehensive benefits package to help you balance work and life plus a culture of trust and engagement. We survey our team members every year to continually enhance work experiences.

HEALTH AND WELLNESS

You have 30 days from your hire date to enroll. Once enrolled, your benefits will begin on the first of the month following 30 days of employment. You may want to consider an interim medical plan to bridge the gap between your employment start date and the date your Riverside medical insurance begins.

MEDICAL & PHARMACY COVERAGE

- Comprehensive medical and pharmacy coverage available at competitive rates
- Lower copays and deductibles when you choose Riverside for you or your family's healthcare needs
- Zero to low copay pharmacy testing supplies and prescription drugs for Diabetes Program participation
- Infertility and bariatric services covered

FULL/PART-TIME ONLY

Unless otherwise noted

- Dental plans to include adult orthodontic & Vision coverage that offers Lasik Vision discounts
- Medical and Dependent Care Flexible spending accounts or Health Savings Accounts (based on medical plan)
- Employer-paid life insurance at 1.5 X salary (full time only) provided the first of the month after 90 days
- Employee-paid term life at up to 5 X salary
- Employer-paid disability (full-time only) provided the first of the month after 365 days
- Employee-paid short-term disability
- Whole life insurance with long-term care rider
- Hospital indemnity, critical illness and accident insurance
- ID theft protection, prepaid legal plan, and home & auto insurance
- Payroll deduction for pet insurance

Available to All

- Wellbeing EAP dedicated to healthcare that helps you and your family navigate and balance work/life.

Labor Pool/PRN/Temporary worker not eligible for full/part-time benefits listed above. Pay Partial not eligible for employer-paid benefits or paid time off.

COMPETITIVE PAY

- Competitive salary or hourly rate right out of the gate
- Discretionary Recognition Bonuses
- Employee Referral Bonuses

RETIREMENT

All team members are eligible, with no waiting period, to make contributions in Riverside's 403(b) plan, with pre-tax and Roth after-tax options.

Match: 50% of up to 5% of your pay, to include up to 2% annually in a Core Contribution. Three year vesting schedule requires 1,000 hours worked each year

PAID TIME OFF

Up to 120 PTO drop hours plus up to 48 hours of paid sick time, annually.

- PTO is prorated based on the employee's full-time equivalency (FTE)
- Sick accumulates each pay period based on FTE
- Drop plan balances do not carryover year to year
- Annual PTO allotment refreshes every year on the annual drop date

DISCOUNTS AND PERKS

- 25% off most Riverside services
- Copay discounts on prescription drugs at Pavilion Pharmacy (Standard plan only)
- Discounts at Riverside Childcare
- Discounts at Wellness & Fitness Centers
- Adoption assistance (full/part-time)
- Dollar\$mart savings on local services

Questions? Call Total Rewards at 757-534-5544, option 5

The benefits information presented is based on information taken from Riverside benefits plan documents and policies. In case of discrepancy between this document and the plan documents and policies the actual plan documents and policies will prevail.

Holidays

The resident is expected to staff a minimum of two (2) holidays as part of the community practice learning experience. Holiday shifts are divided between Memorial Day, Labor Day, Christmas Eve, and New Year's Eve. If a holiday falls on a day of the week that does not coincide with the resident's scheduled community practice day, the schedule will be adjusted for the week so that their community practice day will be on the holiday. In the event a holiday falls on a weekend and the resident is not scheduled to work, they are not required to take PTO. The resident is allowed to pick up Pavilion holiday shifts under Job 2 pending availability per moonlighting policy. For Thanksgiving, Christmas Day, and New Year's Day, the resident may choose to either (a) utilize a PTO day, or (b) utilize a self-scheduled project day as outlined in the Project Days section of the residency program manual.

Project Days

Starting in November residents are allotted a total of 5 days dedicated to working on their residency project. To better align with the timeline and obligations of their project, residents will self-schedule the project days at their own discretion. The resident will be exempt from regularly scheduled learning experience learning activities and responsibilities when utilizing a project day. Project days are limited to 1 day per month (not more than 1 day per learning experience) and must be approved by the Residency Program Director. Additionally, the resident may not use project days on scheduled clinic days for the ambulatory care learning experience. The resident will still be required to complete all evening staffing requirements on the project day if applicable. All approved project days must be communicated to scheduled learning experiences preceptors by the first day of learning experience or may be subject to cancellation. The resident will document all project days used in the duty hours log.

Supervision

The residents report to the Residency Program Director or Director Designee. During learning experiences the resident reports to the preceptor for learning experience activities.

Application

The submission of all application materials is completed through PhORCAS. All candidates must submit a curriculum vitae, three letters of recommendation, academic transcripts, and a letter of intent. Completed applications and all materials must be received no later than January 1st each year or may not be considered for review. The formal application review process will be followed in accordance with the Selection and Acceptance of Pharmacy Resident Candidates policy and procedure.

Licensure

All candidates must have a Doctor of Pharmacy degree or be a candidate for graduation from a college or school of pharmacy accredited by the Accreditation Council for Pharmacy Education (ACPE). If a foreign graduate of pharmacy, must have completed all requirements for equivalency as outlined by the National Association of Board of Pharmacy including Foreign Pharmacy Graduate Examination Committee (FPGEC[®]) Certification. Licensure of the resident as a pharmacist in the state of Virginia is required by August 1st. Any resident not licensed as a pharmacist in the state of Virginia by August 1st may be considered for termination of the residency program at the discretion of the Residency Director, Residency Advisory Committee, and the Director of Pharmacy.

In the event a candidate is unable to obtain licensure in the state of Virginia by August 1st, the resident must submit formally, in writing, an explanation of why licensure has not been obtained, current status of the Multistate Pharmacy Jurisprudence Examination[®] (MPJE[®]) and the North American Pharmacist Licensure Examination[®] (NAPLEX[®]), including scores, scheduled examination dates completed and anticipated if applicable, and an action plan for obtaining licensure. Residents granted extension beyond August 1st must obtain licensure in the state of Virginia by October 31st or will be automatically terminated from the program. Additionally, residents unable to obtain licensure due to failure to pass the NAPLEX[®] or MPJE[®] may be terminated after two failed attempts.

Resident Duty Hours

The Riverside Regional Medical Center Department of Pharmacy supports compliance with the ASHP Duty Hour Requirements to ensure that residents are not compromising patient safety or minimizing the learning experience by working extended periods of time. The residency program director, preceptors, and residents share responsibility to ensure that residents abide by the ASHP requirements during the residency year.

Duty hours are defined as all scheduled clinical and academic activities related to the pharmacy residency program. This includes inpatient and outpatient care; in-house call; administrative duties; and scheduled and assigned activities, such as conferences, committee meetings, and health fairs that are required to meet the goals and objectives of the residency program. Duty hours must be addressed by a well-documented, structured process. Duty hours do not include reading, studying, and academic preparation time for presentations and journal clubs; travel time to and from conferences; and hours that are not scheduled by the residency program director or a preceptor.

Scheduled duty periods are defined as assigned duties, regardless of setting, that are required to meet the educational goals and objectives of the residency program. These duty periods are usually assigned by the residency program director or preceptor and may encompass hours which may be within the normal workday, beyond the normal workday, or a combination of both.

Duty hours must be limited to 80 hours per week, averaged over a four-week period, inclusive of all in-house call activities and all moonlighting. Mandatory time free of duty: residents must have a minimum of one day in seven days free of duty (when averaged over four weeks). Residents should have 10 hours free of duty between scheduled duty and must have at a minimum 8 hours between scheduled duty periods. Continuous duty periods of residents should not exceed 16 hours. The maximum allowable duty assignment must not exceed 24 hours even with built in strategic napping or other strategies to reduce fatigue and sleep deprivation, with an additional period of up to two hours permitted for transitions of care or educational activities.

All residents must abide by the *ASHP Duty-Hour Requirements for Pharmacy Residencies* which can be found at <https://www.ashp.org/-/media/assets/professional-development/residencies/docs/duty-hour-requirements.ashx>.

Residents are expected to update the duty hours log daily. At the end of each month the resident will complete and sign the associated scheduled assessment noting completion and accuracy of the duty hours log in PharmAcademic. It is the resident's responsibility to notify the RPD/DOP if they are in jeopardy of violating duty hour requirements. It is the Director of Pharmacy and the Residency Program Director responsibility to ensure that the scheduled hours do not exceed the duty hour standards.

Moonlighting

Moonlighting is defined as voluntary, compensated, pharmacy-related work performed outside the organization (external), or within the organization where the resident is in training (internal), or at any of its related participating sites. These are compensated hours beyond the resident's salary and are not part of the scheduled duty periods of the residency program.

Additional voluntary, compensated, pharmacy-related work performed inside RRMC pharmacy (internal moonlighting) is permitted depending on labor pool availability. Residents interested in pursuing a labor pool position should notify the RPD by the end of the orientation learning experience and will need to officially apply for a Job 2 labor pool position. If the labor pool position is pursued, residents may be expected to work 2 shifts per month in addition to the staffing responsibilities defined by the pharmacy practice learning experience. All labor pool shifts will be reimbursed at staff pharmacist pay rate (refer to Human Resource Department).

Residents are limited to a maximum of 80 hours of pharmacy activity per week, averaged over a four-week period, inclusive of all duty hours and moonlighting. All moonlighting hours worked should be explicitly delineated in the duty

hours log that is reviewed and cosigned monthly by the RPD. If a resident does moonlight, he/she will be continuously evaluated to determine if the additional employment is impeding their performance. The RPD and resident will discuss at quarterly development meetings to ensure the residents' performance and judgment while on scheduled duty periods does not negatively affect their ability to achieve the educational goals and objectives of their residency program and to provide safe patient care. If any issues are identified all moonlighting shifts will be suspended until an appropriate action plan with corrective measures can be developed.

Employment outside of RPMC or the RPMC PGY1 Pharmacy Residency Program (external moonlighting) is not permitted. Engagement in professional practice activities outside of the Residency Program without prior written consent of the Director of Pharmacy and the Residency Program Director will be grounds for summary dismissal with input from RAC at the discretion of the RPD and DOP. This does not include additional shift work at Riverside Regional Medical Center scheduled by the Director of Pharmacy or his/her designee.

Requirements for Completion

Requirements for completion of the residency program are defined by the Residency Program Requirements for Completion described in the Residency Manual. A residency certificate is awarded upon the successful completion of all residency requirements including:

- State licensure
- Successful completion of the goals and objectives of the program as defined:
 - Obtaining a level of "achieved" for at least 75% of the evaluated goals and objectives of the program.
- Completion of major project including submission of manuscript
- Completion of staffing requirements
- Completion of projects assigned by preceptors and residency staff including (but not limited to):
 - Presentation of research project at ASHP Midyear Clinical Meeting and Eastern States Residency Conference or equivalent state or national conference

Residency certificates will be withheld until all requirements, including the residency project, are successfully completed. Ordinarily, all training requirements must be met within the 12-month residency period. If the resident must take additional time off that exceeds the allotted paid leave (i.e., vacation, sick, holiday) they will not be awarded a certificate of completion unless that additional leave is made up. In the event of extenuating circumstances, a limited extension to complete training requirements may be granted. The resident must request an extension in writing to the Residency Advisory Council which will meet to discuss and vote upon the request. If an extension is granted, the resident will not receive compensation during the extension period. This appointment may be extended up to 3 months for failure to complete requirements for the certificate in the following cases:

- Extended sick leave resulting in failure to meet learning objectives or required time commitments.
- Failure to make satisfactory progress on all assigned goals due to inadequate opportunity provided to achieve.

Failure to meet requirements for certificate due to lack of performance will not be ground for extension.

Residency Appointment Agreement

I, _____, hereby accept appointment for the Riverside Regional Medical Center PGY1 Community Pharmacy Residency Program for 2024-2025. The term of employment at Riverside Regional Medical Center (RRMC) will begin on approximately July 1st with hospital orientation and will be a 12-month experience ending approximately June 30th. I understand the training program under which this appointment is offered is a Postgraduate Year One (PGY1) Pharmacy Program, and I agree to participate in the training program at Riverside Regional Medical Center under the jurisdiction of the faculty of the Riverside Regional Medical Center Pharmacy Residency Program. I understand some elective learning experiences may be offered at Riverside affiliated sites.

I agree to become licensed as a pharmacist in the Commonwealth of Virginia at the earliest date eligible. It will be my responsibility to be examined and licensed. I understand that this appointment, stipend, and benefits will be contingent upon having a valid Commonwealth of Virginia pharmacist license. I acknowledge that if I am not licensed by the Virginia Board of Pharmacy by August 1st of my current residency year, my appointment may be terminated at the discretion of the Residency Advisory Committee (RAC). If granted an extension, I understand I must obtain licensure in the state of Virginia by October 31st or will be automatically terminated from the program. Additionally, if unable to obtain licensure due to failure to pass the Multistate Pharmacy Jurisprudence Examination® (MPJE®) and the North American Pharmacist Licensure Examination® (NAPLEX®) I may be terminated after two failed attempts.

I understand the RRMC Community-Based Pharmacy Residency Program will consist of nine (9) required learning experiences and two (2) elective learning experiences. The required learning experiences include pharmacy orientation, community pharmacy management, ambulatory care I, ambulatory care II, transitions of care, population health, specialty pharmacy, project, and community leadership.

I agree to devote my time and interests fully to the welfare of the patients assigned to me; to assume responsibility in the teaching or professional direction of students and other health care professionals; to be responsive to the professional staff involved in my education and patient care activities; and to take advantage of all opportunities offered to improve my knowledge and skills. I will abide by the pharmacy staff and management policies and procedures, and any applicable policies and procedures of any affiliated hospitals or facilities to which I may rotate as part of my training.

I understand Riverside Health System strives to provide a work environment free of bias or harassment and will conduct myself accordingly. I also understand that procedures are in place to deal with such events, should they occur. While carrying out the duties assigned to me and other matters relating to my conduct, I understand I will be always under the jurisdiction of the Residency Program Director (RPD) and the Director of Pharmacy (DOP). I understand that this contract will be terminated for any serious or repeated breach of ethics or discipline as defined by the Riverside Human Resources policy and procedures with input from the RAC, RPD and DOP.

As a salaried employee I understand I am expected to spend at least 50 hours per week working on activities related to the pharmacy residency program. In addition to these hours, I am expected to spend between 6-16 hours per month staffing the pharmacy as part of the pharmacy practice learning experience. Additional voluntary, compensated, pharmacy-related work performed inside RRMC pharmacy (internal moonlighting) is permitted depending on labor pool availability. For any time spent staffing the pharmacy beyond the 6-16 hours per month I will be reimbursed at staff pharmacist pay rate (refer to Human Resource Department). Employment outside of Riverside Health System or the PGY1 Community Pharmacy Residency Program (external moonlighting) is not permitted.

I understand that I am not to engage in professional practice activities outside of the Residency Program without prior written consent of the Director of Pharmacy and the Residency Program Director. This does not include additional shift work at Pavilion Pharmacy scheduled by the Director of Pharmacy or his/her designee. Any activity that interferes with

residency training or reflects negatively on Riverside will be grounds for summary dismissal with input from RAC at the discretion of the RPD and DOP.

All residents must abide by the *Duty-Hour Requirements for Pharmacy Residencies* as established by ASHP. I agree to abide by the duty hour requirements outlined by ASHP and all policies and reporting procedures of duty hours for the RRMC PGY1 Pharmacy Residency Program described in the Residency Manual. I understand that the Director of Pharmacy and the Residency Program Director will ensure that my scheduled hours do not exceed the duty hour standards. I understand it is my responsibility to notify the RPD/DOP if I am in jeopardy of violating duty hour requirements.

I understand that this offer is contingent upon my successful completion of Riverside's pre-employment process, which may include a drug screen, background search, post-offer assessment, professional reference verification, and other screenings as required based on the position for which I am hired. I acknowledge that any misrepresentations or failure to disclose requested information shall be sufficient cause to result in the immediate revocation or denial of my appointment.

As a PGY1 community pharmacy resident, I will receive an annualized salary of \$53,000, subject to applicable taxes and withholdings. Riverside Health System offers a variety of benefit options. An employee of the RRMC Talent Recruitment Center will contact me to provide more specific information regarding my salary and benefits for a period of 12 months. Benefits will be in accordance with Riverside Regional Medical Center's employee policies. I will receive additional information on these benefit options, orientation, and payroll processing during my onboarding process. I can expect to begin enrolling in benefits after my first day of employment.

During the PGY1 Pharmacy Residency, I will be expected to attend three professional pharmacy meetings: the American Society of Health-System Pharmacists (ASHP) Midyear Clinical Meeting, the Virginia Society of Health-System Pharmacists (VSHP) Fall meeting, and the Eastern States Conference for Pharmacy Residents and Preceptors. A limited stipend will be provided for travel to these meetings. Any additional costs accrued beyond this amount will be at my own expense.

I understand I will be evaluated on a regular basis. I will be provided with these evaluations for my professional growth. A certificate signed by the appropriate representatives of Riverside Regional Medical Center PGY1 Pharmacy Residency Program will be awarded to me upon successful completion of my residency training.

I understand that as a resident I must complete the required components for residency certificate completion including projects and time commitments. A residency certificate is awarded upon the successful completion of all residency requirements including:

- State licensure
- Successful completion of the goals and objectives of the program as defined:
 - Obtaining a level of "achieved" for at least 75% of the evaluated goals and objectives of the program.
- Completion of major project including submission of manuscript
- Completion of staffing requirements
- Participation in a medication-use evaluation - this is inconsistent with page 45
- Completion of projects assigned by preceptors and residency staff including (but not limited to):
 - Drug monograph
 - Presentation of research project at ASHP Midyear Clinical Meeting and Eastern States Residency Conference or equivalent state or national conference

I understand that residency certificates will be withheld until all requirements, including the major project, are successfully completed.

Ordinarily, I must meet all training requirements within the 12-month residency period. If I need to take additional time off that goes beyond the allotted paid leave (such as vacation, sick, or holiday), I will not be awarded a certificate of completion unless I make up for that additional leave. In case of exceptional circumstances, I may be granted a limited extension to fulfill the training requirements. I must submit a written request for an extension to the RAC, which will convene to discuss and vote on my request. If the extension is approved, I will not receive compensation during the extended period. This appointment may be extended up to 3 months for failure to complete requirements for certificate in the following cases:

- Extended sick leave resulting in failure to meet learning objectives or required time commitments.
- Failure to make satisfactory progress on all assigned goals due to inadequate opportunity provided to achieve.

I understand that failure to meet requirements for the certificate due to lack of performance will not be grounds for extension.

I agree to abide in accordance with those laws and regulations, specifically including the Health Insurance Portability and Accountability Act of 1996, as amended (“HIPAA”) and the related Privacy and Security Standards, codified at 45CFR, Parts 160 and 164 (“Privacy and Security Rules”) which will be covered in hospital orientation.

By my signature below, I hereby acknowledge receipt, review, and acceptance of all terms and conditions as outlined in this appointment letter and accompanying policies outlined in the Residency Manual.

Section VI: Evaluations

Assessment Strategy

An essential component of developing the skills of a resident and continuous improvement to the residency program is frequent two-way feedback between residents and preceptors utilizing the ASHP RLS system. The goal of such discussion and interaction is to:

- Discuss the resident's achievements in terms of achieving competency areas, goals and objectives established for the learning experience.
- Provide feedback that may assist the resident with how to improve performance in current learning experience or future learning experiences or practice.
- Provide feedback on how well the resident self-evaluates.
- Provide feedback to the preceptors for continuous improvement of preceptor skills, that may strengthen mentoring during future learning experiences.
- Provide feedback to the RPD, RPC and RAC, to improve the residency program.

The preceptors, residents, RPC and RPD will frequently provide feedback to one another during individual learning experiences, RAC and in general throughout the residency program. Specific program and learning experience feedback may be given via different formats depending upon the learning experience.

The residency assessment procedure utilizes an online tool called PharmAcademic™ to support the evaluation of residents and to provide documentation of a systems-based approach to training for all ASHP-accredited residency programs.

Definitions of Evaluation Criteria

Definitions

Needs Improvement (NI)	Resident is not meeting expectations. Needs frequent supervision
Satisfactory Progress (SP)	Resident shows progress but has not mastered area. Requires some supervision
Achieved (ACH)	Resident has mastered this area. Does not require supervision
Achieved for Residency (ACHR) *assessed by the RPD only	As determined by the RPD, the resident demonstrates continued competency of the assessed goal and can effectively model and/or teach goal to a learner

Competency-based evaluation/assessment tools for the pharmacy residency:

All evaluations are completed through PharmAcademic™ and should be pensive, honest, thorough. If evaluations are not deemed to be sufficient, they may be sent back to the resident or preceptor for further thoughts at the discretion of the RPD. Details of each type of evaluation are listed below. Evaluations are different from feedback. Feedback should be continuous throughout the learning experience and constructive.

Preceptors and residents are required to complete all evaluations within 7 days after end of learning experience. The 7-day completion window includes a co-signature from the party being evaluated. To provide timely feedback and allow all parties to review and co-sign evaluations, all scheduled evaluations in PharmAcademic™ should be completed within 5 days of the scheduled completion date, and co-signatures should be completed within 48 hours of the signed evaluation.

Formative Evaluation: Each preceptor must provide periodic opportunities for the residents to practice and document criteria based, formative self-evaluation of aspects of their routine performance. Formative evaluations can be verbal or written and maybe formal or informal. Often this type of feedback is represented as criteria-based snapshot, performed throughout the learning experience but prior to the final summative evaluation. Examples of formative evaluations include but are not limited to written feedback on notes, in-services, presentations, journal clubs or other learning experience activities. Formative feedback is completed by both residents and preceptors. Residents are required to completed formative self-evaluations in PharmAcademic™ on critical care and IM1 learning experiences.

Summative Evaluation: Written, criteria based, summative assessment to evaluate the resident's achievement of competency areas, goals, and objectives at the end of a learning experience. Summative evaluations are documented in PharmAcademic™ and are completed by both residents and preceptors. The preceptor completes the summative evaluation of the resident for the learning experience while the resident completes the learning experience evaluation and a preceptor evaluation at the end of each learning experience. Summative evaluations are due 5 days from the end date of a learning experience. Co-signatures are due within 2 days of a completed evaluation. Completion of evaluations and co-signatures shall not exceed a total of 7 days from the learning experience end date.

Quarterly Formative and Summative Evaluations: Longitudinal learning experiences' written, criteria based, summative assessments are completed quarterly to evaluate the resident's achievement of objectives performed.

Learning Experience Evaluation and Preceptor Evaluation: Both evaluations are required to be completed by the resident at the end of the learning experience. Longitudinal learning experiences require that these evaluations are completed quarterly in addition to at the end of the learning experience.
